

Ulrich Snyman

Junior Full-Stack Developer

Pretoria, South Africa | ulrichsnymancode@gmail.com | +27 71 545 0776

Portfolio: <https://ulsportfolio.netlify.app>

Professional Summary

Motivated Junior Full-Stack Developer with hands-on experience in Java, Spring, Python, and JavaScript. Driven by solving complex problems and building interactive, database-driven applications. I have built multiple public applications across MERN, Django, Java, and custom backend systems, with a focus on scalable logic and interactive user experiences.

Technical Skills

- Languages: Java, JavaScript, Python, HTML5, CSS3, Sass/SCSS
- Frameworks & Libraries: Spring, React, Django, Node.js, Express, HTMX
- Databases: MongoDB, PostgreSQL, Firebase, Microsoft Access
- Tools & Technologies: Git, WebSockets, WebGL, GraphQL, Delphi

Education

- National Senior Certificate (2024) - Die Hoërskool, Pretoria, South Africa
- Subjects included: IT, Mathematics, Engineering Graphics & Design, Physical Sciences, English, Afrikaans.
- Code College Full stack software development training with completion of 10 professional certificates across multiple technologies. (Full list of certificates available on portfolio website.)

Other Achievements

- Team Leader(3 years) and Participant for First Lego League Robotics (2021–2023)
- National Silver Award (2023)
- Academic Focus: Mathematics, IT, Engineering Graphics & Design, Physical Science

Selected Projects

- Collaborative Canvas (MERN + WebSockets): Real-time collaborative drawing board with custom pixel storage and live syncing.

- Digital Recipes App (React/Firebase): Recipe management platform with CRUD operations.
- Task Management System (Django/PostgreSQL): Full-stack productivity tool with authentication and relational storage.
- Chat Application (Node.js/WebSockets): Multi-user live chat with custom broadcast logic.

Personal Attributes

- Strong problem-solving mindset
- Adaptable and fast learner
- Enjoys clean, maintainable code
- Enjoys challenging technical projects

Interests

Software engineering, robotics, backend systems, creative tool development, AI engineering
