Databases & Tools MongoDB, PostgreSQL, Firebase, Microsoft Access, Git, WebSockets, GraphQL, Delphi	

Work Experience

- **Site Manager – Ubuntu Gaspet Energy Depot** | 3 months
- Managed daily diesel and AdBlue depot operations, including pumps, tanks, fuel trucks, stock control, administration, customer communication, follow-ups, and coordination with leadership.
- Led depot staff, supported team wellbeing, maintained inventory for AdBlue and oil products including Shield and Castrol, supervised gate security and CCTV monitoring, and solved operational issues under pressure.

Education

- **National Senior Certificate (2024)** – Die Hoërskool Menolpark, Pretoria
- Subjects: IT, Mathematics, Engineering Graphics & Design, Physical Sciences, English, Afrikaans.
- **Code College** – Full-stack software development training with 10 professional certificates, demonstrating computer literacy, technical learning ability, and process-following skills.

Technical Projects

- **Collaborative Canvas** (MERN + WebSockets): Built a real-time drawing board with live syncing and multi-user interaction logic, showing troubleshooting, persistence, and technical learning ability.
- **Digital Recipes App** (React/Firebase): Created a recipe management platform with CRUD functionality, user-focused workflows, and database-backed records.
- **Task Management System** (Django/PostgreSQL): Built a productivity tool with authentication and relational storage, supporting organised task tracking and structured data management.

Personal Attributes

Fluent in Afrikaans and English | Patient and professional with clients | Strong problem-solving mindset | Organised and detail-focused | Reliable with follow-ups | Adaptable, eager to learn, and calm under pressure
